

**ABSTRACT**

A cover and a dispenser for a tissue package, said dispenser comprising a  
5 tissue dispensing aperture and a manipulating opening, both opening into a tissue-  
containing space of the package. The tissue dispensing aperture is sized for  
dispensing one tissue at a time while separating a duty tissue from a successive  
tissue; and the manipulating opening is normally closed by a flap and is deformable  
to allow introduction of a user's fingers into the tissue-containing space, and  
10 wherein said tissue dispensing aperture and the manipulating opening are  
coverable.
